European Union Directives Conformance Statement

CE Hereby, Motorola Inc., declares that this H780 is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

You can view your product's Declaration of Conformity (DoC) to Directive 1999/5/EC (the R&TTE Directive) at www.motorola.com/rtte.

Caring for the Environment by Recycling

When you see this symbol on a Motorola product, do not dispose the product with household waste.

Recycling Mobile Phones and Accessories

Do not dispose of mobile phones or electrical accessories, such as chargers or headsets, with your household waste. In some countries or regions, collection systems are set up to handle electrical and electronic waste items. Contact your regional authorities for more details. If collection systems aren't available, return unwanted mobile phones or electrical accessories to any Motorola Approved Service Centre in your region.

FCC Notice to Users

Users are not permitted to make changes or modify the device in any way. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. See-47-CFR-Sec.-15.21.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. See-47-CFR-Sec.-15.19(3).

Before you begin

See figure 1 on page 1.

Take a moment before you get started to familiarize yourself with your new H780 Headset.

1 Speaker

2 Call Button

3 Volume Buttons

4 Power Switch

5 Microphone

6 Noise Cancellation Button

7 Indicator Light/Microphone (on side)

Charging your headset

See figure 2 on page 1.

The indicator light turns red when the battery is charging. It may take up to 1 minute for the indicator light to turn on. When the headset's battery is fully charged (about 2 hours), the indicator light turns green.

Note: Headset is not functional while charging.

This product uses a lithium ion, rechargeable, non-replaceable battery.

Your battery is designed to last the life of the product. It should only be removed by a recycling facility. ANY ATTEMPT TO REMOVE OR REPLACE YOUR BATTERY WILL DAMAGE THE PRODUCT.

Quick battery check

While your headset is turned on and not on a call, you can check the battery charge level by pressing and holding both Volume buttons.

Note: This feature does not work when headset is in pairing mode.

The indicator light displays charge status until you release the buttons. The colour of the light indicates the remaining talk time.

Headset Indicator	Available Talk Time
Red	Less than 2 hours
Yellow	From 2 to 4.5 hours
Green	Greater than 4.5 hours

Wearing your headset

See figure 3 on page 2

The ear cushion is fitted onto the end of your headset's earpiece speaker and placed onto your ear when using your headset.

Your H780 headset is supplied with multiple ear cushions. Your headset's performance is greatly dependent upon achieving a good fit on your ear. Therefore, we recommend trying all the supplied ear cushions with your headset.

You can wear your H780 headset on your left or right ear. The headset comes ready for the right ear.

Placing the headset on your ear: **see figure 4 on page 2**
Placing the headset on the left ear: **see figure 5 on page 2**

Turning headset on and off

See figure 1 on page 1.

To turn ON your H780, slide the Power switch towards the indicator light. The indicator light first flashes blue for several seconds, then:

- flashes blue (if paired and connected with another device).
- becomes steadily blue (if ready to be paired).

To turn OFF your H780, slide the switch toward the charging plug (the orange color under the switch is displayed). The indicator light will turn off.

Noise cancellation button

See figure 1 on page 1

Your H780 headset has a noise cancellation button that enables you to hear the difference of dual microphone noise cancellation.

The dual noise cancellation feature is on by default whenever H780 is powered on. Noise cancellation is always on each time a new call is received or placed. To turn the feature off (or back on), tap the Noise Cancellation button. **The button only works during an active call.**

Pairing your headset

Your phone's Bluetooth feature is off by default. To use your headset, you must turn on the Bluetooth feature in your phone. Please check your phone's user's guide.

Before you can use your headset, you must pair (link) it with your phone.

1 Ensure headset is in pairing mode

Power on the headset by sliding Power switch to the On position. The indicator light first flashes during power up, then initiates pairing. After a few moments, the indicator light will be steadily lit in blue to indicate headset is in pairing mode.

If the headset does not enter into pairing mode, see "Troubleshooting" section.

2 Set your phone to look for your headset

• Perform a device discovery from the phone. For details about device discovery, consult your phone's user's guide. The phone lists Bluetooth devices it finds.

• Select **Motorola H780** in the list of discovered devices and confirm by following the on-screen prompts.

• When prompted by the phone, enter the passkey **0000** and confirm.

Pairing is successful when the headset indicator flashes purple and blue.

Test and use

Your phone and headset are now paired and ready to make and receive calls. To confirm they are successfully paired and operating properly, place the headset over your ear and make a call from your phone. You will hear ringing from the headset.

After you have successfully paired your phone and headset, you do **not** need to repeat these steps each time you use the headset.

Using your headset : making and receiving calls

Your headset supports both Handsfree and Headset Profiles. Accessing call functions depends upon which profile your phone supports. See your phone's user's guide for more information.

Note: some features are phone/network dependent.

Function	Action
Answer a call	Tap the call button, hear the ring tone, then a low-to-high tone
End a call	Tap the Call button, and hear a high-to-low tone
Reject a call	Press and hold either Volume button until you hear a tone
Redial last call	Press and hold the Call button until you hear a tone
Make a voice dial call phone)	Tap the Call button and speak the (primary name after the tone
Answer a second incoming call	Press and hold the Call button (places first call on hold), and hear a tone
Reject second incoming call	Press and hold either Volume button until you hear a tone
Transfer a call from the headset	Slide the power switch to the OFF position to the phone
Mute or unmute a call	Tap both Volume buttons until you hear a mute tone

Using your headset with a second phone

Multipoint technology allows you to make and receive calls from two Bluetooth enabled devices like your personal and business phones.

1 To pair a second phone to your headset

- Turn off any phones or devices that are already paired with your headset.
- Turn off your headset.
- Pair your headset with your second phone (as described in "Pairing your headset" section).

2 To reconnect your headset with your first phone (and thus be connected to both phones)

- Turn on the first phone
- Select **Motorola H780** from your paired devices list (for details about device discovery, consult your phone's user's guide)

Your headset is now connected to both phones.
The last paired phone (your second phone) is now your primary phone for voice dial functionality. After you have successfully paired and connected both phones with your headset, you do NOT need to repeat these steps.

Use the following tips when using H780's multipoint technology :

- Incoming calls can be answered from both phones :

  - When answering a call, the idle phone is disconnected from the headset.
  - When the call ends, the idle phone is automatically reconnected to the headset.

- Last number redial dials the last outgoing call made from the primary phone.

- Voice dial is accessible from your primary device (last paired phone) by tapping the Call button and speaking the name after the tone.

- If your headset does not automatically reconnect to both phones, turn the H780 off and on again to reconnect

Indicator lights

With No Charger Plugged In

Headset Indicator	Headset Statuts
Off	Power off
3 blue flashes	Powering on/off
Steady blue	Pairing mode
Quick blue/purple flashes	Pairing successful
Quick blue flash	Incoming/outgoing call on primary phone
Quick purple flash	Incoming/outgoing call on secondary phone
Slow blue pulse	Connected (on a call)
Slow blue flash	Standby (phone connected, not on a call)
Slow green flash	Standby (2 phones connected, not on a call)
Red flash	Idle (not connected to phone)
Slow purple pulse	Connected call muted
Quick red flash	Low battery

Note: After 20 minutes on a call or of inactivity, the light stops flashing to conserve power, but the headset remains on. To disable the indicator light, press and hold both Volume buttons while turning headset on.

Note : Set your primary and secondary phones to different ring tones to know which phone is ringing when wearing the headset.

With the Charger Plugged In

Headset Indicator	Headset Status
Red	Battery level less than 50% charge
Yellow	Battery level more than 50% charge
Green	Charging complete

Audio tones

Audio Tone	Headset Status
Ring tone	Incoming call
Short tone	Phone network not available
High to low tone	End call
2 short tones when pressing Volume button during a call	Volume at minimum or maximum
Ascending tone	Mute enabled
Low tone (repeated every 15 seconds)	Mute reminder
Descending tone	Mute disabled
Low to high tone	Connection confirmation/voice activation
No audio indications ; deteriorating quality	Out of range
2 tones repeated every minute	Low battery

Troubleshooting

My headset will not enter pairing mode

Make sure that any devices previously paired with the headset are turned off. If the indicator light is flashing in blue, first turn off the other device, then turn the headset off and on. The indicator light becomes steadily lit in blue indicating the headset is now in pairing mode.

My headset will not pair with my phone

Turn the headset on by using the Power switch. Press the Call button and both Volume buttons for 5 seconds. The indicator light turns solid blue. The headset is now in pairing mode to complete the pairing process.

My phone doesn't find my headset

Make sure the indicator light on your headset is on (lit in blue) and steady when your phone is searching for devices.

My headset worked before but now it's not working

Make sure your phone is on and the Bluetooth feature is turned on in your phone. If the Bluetooth feature was turned off or was turned on only temporarily, you may need to restart the Bluetooth feature and pair your phone and headset again.

If you have any additional questions, please call your hotline number (0870-9010-555) or visit us at www.hellomoto.com.
